

Solanum melongena L.

EGGPLANT

BALUROI F1

NEXEEDS®

**Very productive erected plant
Very firm fruits with light green flesh
Average weight higher than 130 g**

Cultivation	Shape	Fruit length	Skin colour	Maturity
Open field	Elongated	20-25 cm	Purple	Very early

Solanum melongena L.

EGGPLANT

BONICA F1

NEXEEDS®

**Vigorous plant for non-heated greenhouse
and open field**
Beautiful very firm fruits
Average weight higher than 250 g

Cultivation	Shape	Fruit length	Skin colour	Maturity
Open field	Oval	12-15 cm	Dark purple	Very early

Solanum melongena L.

EGGPLANT

SOFIA F1

NEXEEDS®

Erected variety

Uniform fruits, firm and shiny

Average weight higher than 190 g

Cultivation	Shape	Fruit length	Skin colour	Maturity
Open field	Elongated	18-22 cm	Dark purple	Early

Solanum melongena L.

EGGPLANT

VERONICA F1

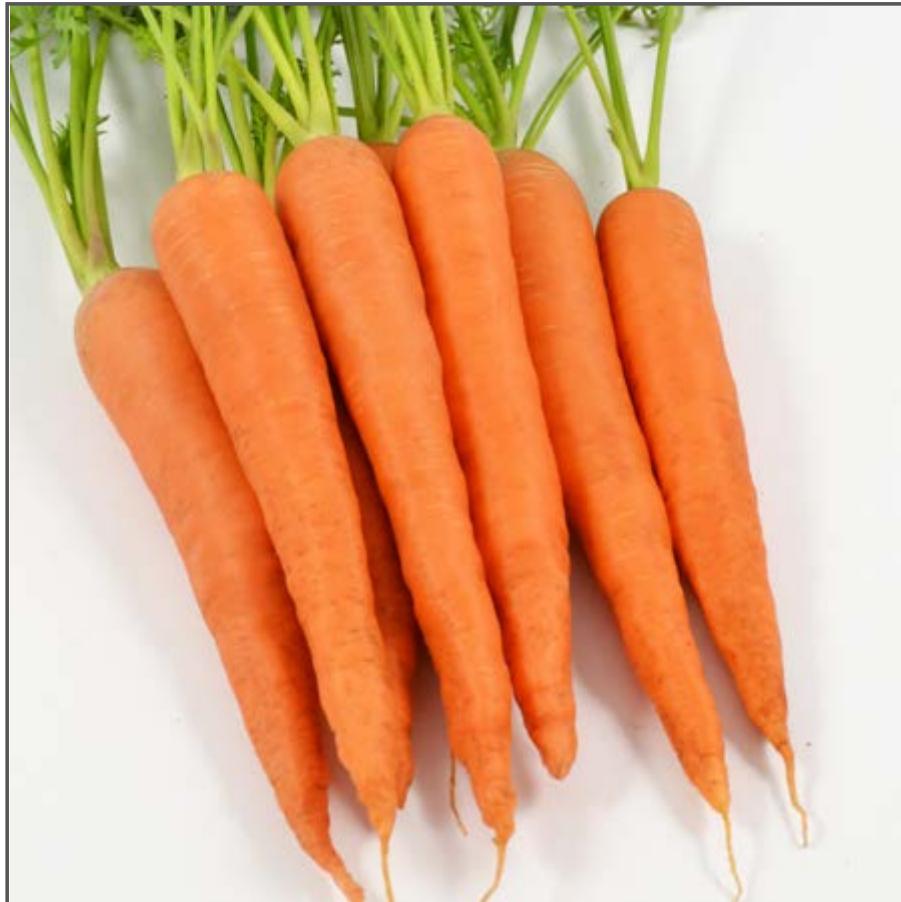

Semi erected variety
Water drop fruit shape
Very firm and uniform fruits
Average weight higher than 250 g

Cultivation	Shape	Fruit length	Skin colour	Maturity
Open field	Oval	18-20 cm	Dark purple	Medium

Daucus carota L.

CARROT

AGATHA F1

**Productive hybrid nantaise type
Long and cylindrical root
Good preservation in the field
Nice root colour, very homogeneous**

Type	Maturity	Root length	Diameter	Tolerances
Nantaise	100-110 days	16-18 cm	4 cm	AI

Daucus carota L.

CARROT

NATACHA F1

**Hybrid with dark green upright foliage
Long and consistent root
Excellent tasting qualities**

Type	Maturity	Root length	Diameter	Tolerances
Nantaise	110-120 days	15-17 cm	4 cm	AI

Brassica oleracea var. *capitata*

CABBAGE

AFRICA F1

NEXEEDS®

**Excellent variety for winter production
Erected plant for easy harvest
Stands very good in the field
Compact head**

Shape	Average weight	Colour	Maturity	Tolerances
Semi globe	> 2 kg	Dark Green	75 days	Y, BR

Brassica oleracea var. capitata

CABBAGE

HARMONIA F1

NEXEEDS®

Hybrid for spring to summer plantings
Firm head with good conservation
Disease and high temperatures tolerances
Good resistance to bursting

Shape	Average weight	Colour	Maturity	Tolerances
Flat	> 2 kg	Dark Green	70 days	Y

Brassica oleracea var. capitata

CABBAGE

KING OF KING CROSS F1

NEXEEDS®

Variety adapted to african markets
Low plant with flat leaves
Perfect for tropical conditions
Firm head with bursting resistance

Shape	Average weight	Colour	Maturity	Tolerances
Flat	> 2 kg	Medium Green	60 days	Y

Brassica oleracea var. capitata

CABBAGE

MADIBA F1

NEXEEDS®

**Nice dark green head
Excellent tasting qualities
Late bursting and good heat tolerance**

Shape	Average weight	Colour	Maturity	Tolerances
Semi globe	> 2 kg	Dark Green	75 days	Y

Brassica oleracea var. capitata

CABBAGE

MARIMBA F1

NEXEEDS®

Early maturity variety
Very productive and compact head
Very good heat tolerance

Shape	Average weight	Colour	Maturity	Tolerances
Flat	> 2 kg	Medium Green	60 days	BR

Brassica oleracea var. capitata

CABBAGE

ORIENTAL SUPER CROSS F1

NEXEEDS®

Productive hybrid for big head markets
Very compact head with late bursting
Very good heat tolerance

Shape	Average weight	Colour	Maturity	Tolerances
Flat	> 6 kg	Medium Green	85 days	Y, BR

Brassica oleracea var. *capitata*

CABBAGE

SIMBA F1

NEXEEDS®

Shortest precocity hybrid of our range
Resists well in rainy conditions
Heat tolerant
Firm head with bursting resistance

Shape	Average weight	Colour	Maturity	Tolerances
Globe	> 1 kg	Medium Green	55 days	Y, BR

Cucumis sativus L.

CUCUMBER

ELITA F1

NEXEEDS®

**Mini beet alpha type hybrid
High yield with good homogeneity
Vigorous plant**

Cultivation	Fruiting	Fruit length	Maturity	Tolerances
Greenhouse	Multi	11-12 cm	Early	ZYMV

Cucumis sativus L.

CUCUMBER

LAMBADA F1

Beit alpha type hybrid
For plantings from spring to autumn
Excellent yield

Cultivation	Fruiting	Fruit length	Maturity	Tolerances
Greenhouse	Multi	16-17 cm	Medium	Ccu, ZYMV, CMV, DM, PM

Cucumis sativus L.

CUCUMBER

MARISTA F1

NEXEEDS®

Beit alpha type hybrid
Perfect for summer production
Very good homogeneity
Good yield in hot conditions

Cultivation	Fruiting	Fruit length	Maturity	Tolerances
Greenhouse	Multi	15-16 cm	Early	Ccu, ZYMV, CMV, DM, PM

Cucurbita pepo L.

SQUASH

CELIA F1

NEXEEDS®

**For protected and open field production
Vigorous plant
Good cold tolerance**

Cultivation	Shape	Colour	Maturity	Tolerances
Autumn-winter	Cylindrical	Light green with dark stripes	Medium early	HR : ZYMV

Cucurbita pepo L.

SQUASH

CRISTAL F1

NEXEEDS®

Zucchini type hybrid

For protected and open field production

Very flexible variety for all seasons

Cultivation	Shape	Colour	Maturity	Tolerances
Autumn-winter	Cylindrical	Dark green	Medium early	HR : WMV

Cucurbita pepo L.

SQUASH

FARIDA F1

**White cylindrical squash
Semi erected and open plant
Average fruit length : 13-18 cm**

Cultivation	Shape	Colour	Maturity	Tolerances
Spring-autumn	Cylindrical	White/Light green	Medium early	HR : CMV, ZYMV, WMV

Cucurbita pepo L.

SQUASH

HANANE F1

NEXEEDS®

**Easy harvest thanks to open foliage
Long production period
Average fruit length : 20-22 cm**

Cultivation	Shape	Colour	Maturity	Tolerances
All year	Cylindrical	Light green with dark stripes	Early	Px

Cucurbita pepo L.

SQUASH

PALMA F1

**For protected and open field production
all year**
Good virus and disease tolerances
**Consistent colour whatever sunshine and
temperature**

Cultivation	Shape	Colour	Maturity	Tolerances
All year	Bulbous	Light green	Medium late	HR : ZYMV

Cucurbita pepo L.

SQUASH

RANA F1

NEXEEDS®

**For protected and open field production
Erected plant with dark green foliage
Excellent variety for mature fruits harvest**

Cultivation	Shape	Colour	Maturity	Tolerances
Autumn-winter	Semi bulbous	Very light green	Early	Px

Cucurbita pepo L.

SQUASH

SILVIA F1

NEXEEDS®

New !
Erected and vigorous plant
Wide covering leaves
Average fruit length : 8-12 cm

Cultivation	Shape	Colour	Maturity	Tolerances
All year	Bulbous	Light green	Medium early	HR : CMV, WMV,ZYMV, SqMV

Cucurbita pepo L.

SQUASH

YAOUNDÉ F1

NEXEEDS®

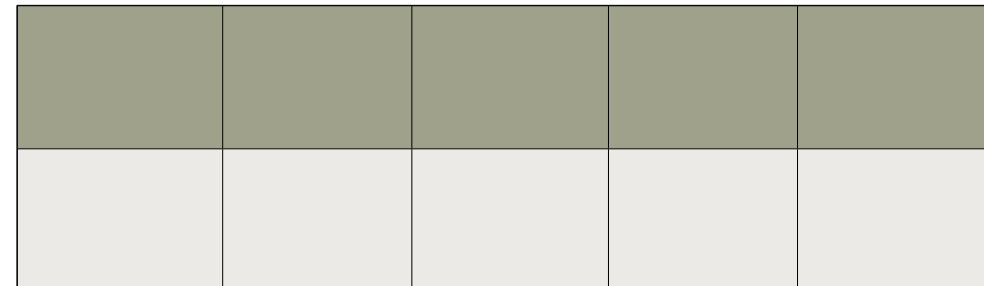

**Erected plant for tropical areas
Dark green foliage
Consistent colour whatever sunshine and temperature**

Cultivation	Shape	Colour	Maturity	Tolerances
All year	Cylindrical	Dark green	Medium early	Px

Cucumis melo L.

MELON

CLARA F1

**Cream flesh, sweet and delicious
Good covering foliage
Excellent shelf life**

Type	Shape	Size	Flesh colour	Tolerances
Ananas	Oval	> 2,5 kg	Cream	Fom:0,1,2, MNSV, Px:1,2,5

Cucumis melo L.

MELON

PRISCA F1

NEXEEDS®

**Excellent variety for export market
Outstanding long shelf life
Very small seeds cavity**

Type	Shape	Size	Flesh colour	Tolerances
Ananas	Oval	> 2 kg	Orange	Fom:0,1,2, Px:1,2,5

Cucumis melo L.

MELON

ZAKY F1

NEXEEDS®

**Orange flesh, sweet and tasty
Very homogeneous fruits
Small seeds cavity**

Type	Shape	Size	Flesh colour	Tolerances
Ananas	Oval	> 3 kg	Orange	Fom:0,1,2, MNSV, Px:1,2,5

Cucumis melo L.

MELON

CONTESSA F1

NEXEEDS®

**Sweet and delicious flesh
Nice covering foliage
Excellent tolerance to salinity**

Type	Shape	Size	Flesh colour	Tolerances
Galia	Round	> 2 kg	Green	Fom:0,2, MNSV, Px:2,5

Cucumis melo L.

MELON

NOELLA F1

NEXEEDS®

**Delicious sweet flesh
Very small seeds cavity
Excellent long shelf life**

Type	Shape	Size	Flesh colour	Tolerances
Galia	Round	> 1,5 kg	Green	Fom:0,1, MNSV, Px:2,5

Cucumis melo L.

MELON

MONICA F1

NEXEEDS®

**Yellow type melon
Sweet homogeneous fruits
Firm flesh for a long shelf life**

Type	Shape	Size	Flesh colour	Tolerances
Yellow	Oval	> 2,5 kg	White	Fom:0,1, Px:1,2,5

Cucumis melo L.

MELON

MAGIC F1

NEXEEDS®

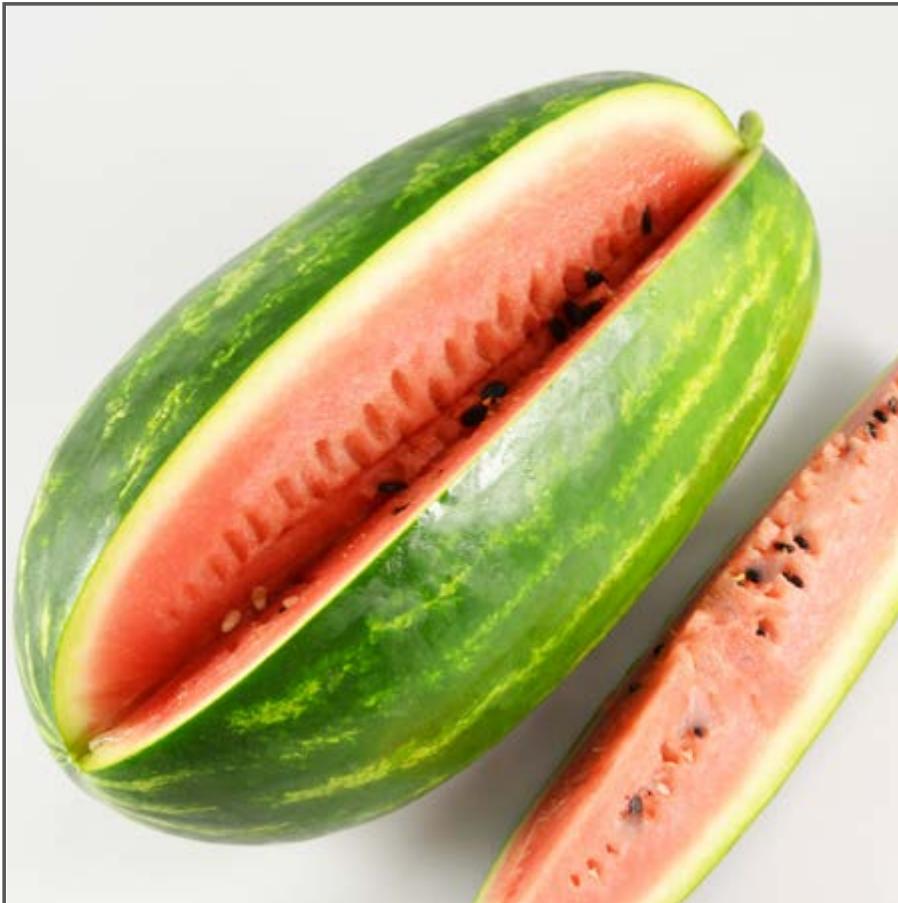

**Nice green striped skin
Good results in both tunnels and open field
Excellent long shelf life for export market**

Type	Shape	Size	Flesh colour	Tolerances
Charentais	Round	> 1,5 kg	Orange	Fom:0,1,2, MNSV, Px:1,2,5

Citrullus lanatus

WATERMELON

JANNA F1

NEXEEDS®

**Very elongated fruits, dark green with light green stripes
2 to 3 fruits per plant
Good shelf life**

Type	Shape	Size	Brix	Tolerances
Crimson sweet	Very elongated	> 12 kg	12	Fom:0,1, Co

Citrullus lanatus

WATERMELON

WA1124 F1

NEXEEDS®

**Productive hybrid
Firm and crispy flesh
Good shelf life**

Type	Shape	Size	Brix	Tolerances
Crimson sweet	Oval	> 10 kg	12	Fom:0,1, Co

Citrullus lanatus

WATERMELON

WA1126 F1

NEXEEDS®

**Very productive in hot conditions
Excellent fruits homogeneity
Firm and juicy flesh**

Type	Shape	Size	Brix	Tolerances
Crimson sweet	Oval	> 10 kg	12	Fom:0,1, Co

Citrullus lanatus

WATERMELON

WA114 F1

NEXEEDS®

**High yield potential hybrid
Beautiful fruits with sweet flesh
Very good shelf life**

Type	Shape	Size	Brix	Tolerances
Crimson sweet	Oval	> 10 kg	13	Fom:0,1, Co

Capsicum annuum

HOT PEPPER

ALTAR F1

NEXEEDS®

**Anaheim type hybrid
Shining fruits and slightly wrinkled
Medium spiciness**

Cultivation	Shape	Size	Colour	Tolerances
Open field	Goat horn triangle	40 x 220 mm	Red to dark red	Tm 0-2

Capsicum annuum

HOT PEPPER

HP887 F1

NEXEEDS®

**Medium early hybrid with strong vigour
Easy to cultivate
Thick flesh and slightly wrinkled skin**

Cultivation	Shape	Size	Colour	Tolerances
Open field	Goat horn triangle	35 x 220 mm	Green to red	Tm 0-2

Capsicum annuum

HOT PEPPER

MISTRAL F1

NEXEEDS®

Anaheim type hybrid
Earlier and performs very well in hot conditions
Less spiciness

Cultivation	Shape	Size	Colour	Tolerances
Open field	Goat horn triangle	45 x 220 mm	Green to red	Tm 0-2, PepYMV

Capsicum annuum

SWEET PEPPER

PE1079 F1

NEXEEDS®

Greenhouse sweet pepper hybrid
High fruit quality with long shelf life
Average fruit weight : 160-180 g
Enjoyed on small fruit size markets

Cultivation	Shape	Size	Skin colour	Tolerances
Greenhouse	Blocky	70 x 70 mm	Green to red	TMV, TSWV

Capsicum annuum

SWEET PEPPER

ENZO F1

NEXEEDS®

Greenhouse sweet pepper hybrid for autumn transplanting
Very strong plant and productive variety
Average fruit weight : 180-250 g
Good resistance to transport

Cultivation	Shape	Size	Skin colour	Tolerances
Greenhouse	Blocky	80 x 80 mm	Green to red	TMV, TSWV

Capsicum annuum

SWEET PEPPER

MONZA F1

NEXEEDS®

**Greenhouse sweet pepper hybrid for autumn transplanting
Yellow maturing fruits
Excellent shelf life for export market
Average fruits weight : 180-220 g**

Cultivation	Shape	Size	Skin colour	Tolerances
Greenhouse	Blocky	85 x 80 mm	Green to yellow	TMV, TSWV

Capsicum annuum

SWEET PEPPER

MARANELLO F1

NEXEEDS®

Greenhouse sweet pepper hybrid for autumn and winter production
Very consistent orange fruits
Long shelf life
Average fruits weight : 180-200 g

Cultivation	Shape	Size	Skin colour	Tolerances
Greenhouse	Blocky	80 x 85 mm	Green to orange	TMV

Capsicum annuum

SWEET PEPPER

PE1081 F1

NEXEEDS®

**Greenhouse sweet pepper hybrid for autumn and winter production
Uniform and regular fruits
Average fruit weight : 180-200 g**

Cultivation	Shape	Size	Skin colour	Tolerances
Greenhouse	Blocky	80 x 80 mm	Green to red	TMV, TSWV

Capsicum annuum

SWEET PEPPER

ANDREA F1

**Open field sweet pepper hybrid
Flexible variety with good tolerances
Dark green foliage**

Cultivation	Shape	Size	Skin colour	Tolerances
Open field	Blocky	100 x 90 mm	Green to red	TMV, TSWV, Xcv:1,5

Capsicum annuum

SWEET PEPPER

GIANT F1

NEXEEDS®

Open field and tunnel sweet pepper hybrid

Flexible variety in changing growing conditions

Very productive in hot conditions

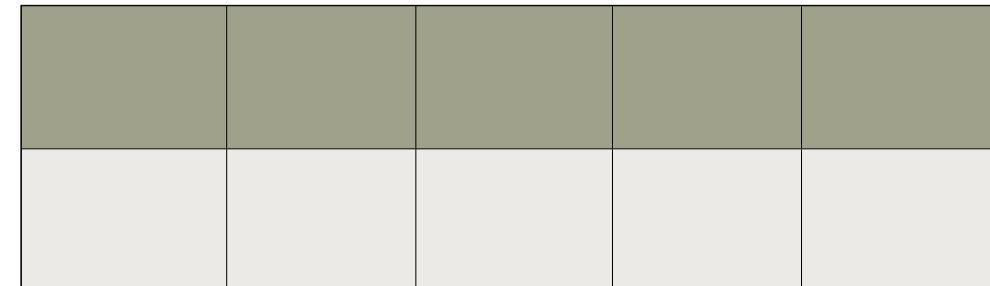

Nice covering foliage

Cultivation	Shape	Size	Skin colour	Tolerances
Open field	Blocky	120 x 120 mm	Green to red	TMV, TSWV, Xcv:1,5, TEV

Indetermi-nated	Round	180-200 g	Medium early	Tm:2, Vd, N

Solanum lycopersicum L.

TOMATO

VOLGA F1

NEXEEDS®

High yield

Around 10 fruits per cluster

Good resistance to cracking

Type	Shape	Weight	Maturity	Tolerances
Indetermi-nated	Plum	110-140 g	Medium early	Tm:2, TYL-CV, TSWV, Vd, N

Solanum lycopersicum L.

TOMATO

CURLY F1

NEXEEDS®

**Excellent variety for cluster harvest
Average 6 fruits per cluster
Firm fruits adapted to export market**

Type	Shape	Weight	Maturity	Tolerances
Indeterminated	Round	120-150 g	Medium early	Tm:2, TYLC

Solanum lycopersicum L.

TOMATO

TC1222 F1

NEXEEDS®

**Round shape cherry tomato
For spring to autumn production
Very high quality fruits**

Type	Shape	Weight	Maturity	Tolerances
Indetermin- ated	Round	15-20 g	Medium early	Tm:2, Vd, TYLCV, TSWV, Pi, N

Solanum lycopersicum L.

TOMATO

TC10147 F1

NEXEEDS®

**For cluster harvest from spring to autumn
Highly tolerant variety
Very homogeneous clusters**

Type	Shape	Weight	Maturity	Tolerances
Indeterminated	Oval	30-35 g	Medium early	Tm:2, Vd, TYLCV, TSWV, Pi, N

Citrullus lanatus

CUCURBITS ROOTSTOCK

TURBO F1

NEXEEDS®

Rootstock for melon, watermelon and cu-cumber

Quick germination and excellent vigour

Do not change grafted variety characteris-tics

Strong root system

Tolerances : Fom:0-2, Foc:1-2

Solanum lycopersicum L.

TOMATO ROOTSTOCK

BOOSTER F1

NEXEEDS®

1 to 2 more fruits per cluster
Do not change grafted variety characteristics
Very good resistance to nematodes
Strong root system
Tolerances : Tm, Vd, Fol:0-2, TSWV, N
